**THE EFFECT OF THE STRETCH-
SHORTENING CYCLE MOVEMENT
PATTERN AND ITS RELATIONSHIP WITH
PRIMARY PERFORMANCE INDICATORS IN
RUGBY UNION**

CONTENTS

	Page
List of Tables	i
List of Figures	ii
ACKNOWLEDGEMENTS	iii
ABSTRACT	iv
CHAPTER I	
1.0 Introduction	1
1.1 Aim of the study	2
CHAPTER II	
2.0 Review of Literature	4
2.1 Rugby Performance / Profiling	4
2.2 The Stretch-Shortening Cycle	9
2.3 Tests to Measure The SSC	12
CHAPTER III	
3.0 Methodology	17
3.1 Sample Group	17
3.2 Controlled Warm-up	17
3.3 Testing for Height Measurement	18
3.4 Testing for Body Mass Measurement	18
3.5 Testing for SSC and Lower Body Power	18
3.5.1 The Squat Jump Protocol	19
3.5.2 The Counter-Movement Jump Protocol	20
3.5.3 The 5 Rebound Jump Protocol	20
3.6 Speed Measurement	20
3.6.1 Speed Test Protocol	21

3.7	Testing for Lower Leg Strength	21
3.7.1	The Squat Test Protocol	22
3.8	Statistical Analysis	22
CHAPTER IV		
4.0	Results	24
4.1	Differences	24
4.2	Relationships	25
CHAPTER V		
5.0	Discussion	33
5.1	Limitations	40
5.2	Future Research	41
CHAPTER VI		
6.0	Conclusion	43
	REFERENCES	45
	APPENDICIES	
	Appendix 1. Informed Consent form	50
	Appendix 2. PAR-Q	52
	Appendix 3. Raw Data Table	54

List of Tables

	Page
Table 1. Comparison of Physiological Characteristics of amateur, semi-pro and pro rugby league players	8
Table 2. Mean and Standard Deviation Values For All Subjects in Each Variable	24
Table 3. Significance Level Between Forwards and Backs for Each Variable	24
Table 4. Full Group (n=20) Correlations (r-value) (and 95% Confidence Intervals)	25
Table 5. Forward (n=10) Correlations (and 95% Confidence Intervals)	25
Table 6. Back (n=10) Correlations (r-value) and (95% Confidence Intervals)	26
Table 7. Common Variance Values For All Subjects	26

List of Figures

	Page
Figure 1. Komi's (2000) 3 phase SSC movement pattern during walking, hopping and running	10
Figure 2. Motions a) in a countermovement jump and b) in a squat jump. The CoM indicates moves strictly in the vertical direction (adapted from Linthorne, 2001)	13
Figure 3. Relationship Between Full Sample Squat Jump and 10m Sprint	27
Figure 4. Relationship Between Full Sample Squat Jump and 40m Sprint	28
Figure 5. Relationship Between Full Sample CMJ and 10m Sprint	29
Figure 6. Relationship Between Full Sample CMJ and 40m Sprint	30
Figure 7. Relationship Between Full Sample 5BJ and 10m sprint	31
Figure 8. Relationship Between Full Sample 5BJ and 40m sprint	31

Acknowledgments

I would like to extend a warm thank you to my dissertation tutor, Mr. Robert Meyers, for all his support and encouragement throughout my dissertation process. His guidance and advice has been very much appreciated, and has helped me to progress through this stage of my education. I would also like to mention my appreciation for Dr. Jon Oliver, who has also been on hand regularly for advice and guidance, and without the help of the above, would have made my experience of conducting the study a lot harder.

A big thank you also goes out to all the participants who were involved in my dissertation, because without them I would have been unable to add any findings to the literature that already exists.
